STUDENT MEDICAL EXAMINATION NOTICE

As a cherished student of Delexes University College (DUC), your personal health and well-being are of utmost importance to us. To ensure a safe and healthy academic environment, it is necessary for all new/fresh students to undergo a compulsory and comprehensive medical examination.

This process is designed, among other things, to:

- identify and manage health conditions.
- prevent the spread of communicable diseases.
- support your academic journey throughout your study; and,
- readily provide emergency information on your health status to medical practitioners especially when you are unable to speak.

Prerequisite for Course Registration

Please note that the submission of a completed medical examination form is a condition antecedent for proceeding with course registration. Students will not be able to complete their registration processes without complying with this prerequisite stage.

Professional Medical Examination

The medical examination must be carried out by a professionally qualified and registered medical doctor. This ensures that the examination is thorough, accurate and credible, providing the necessary assurance of your health status.

Guidelines for submission

All new/fresh students must complete and submit their enveloped medical examination forms to the University Registrar's Office. A scheduled staff at our Accounts Office will endorse and sign your course registration form before proceeding to your respective faculty/school to finalize registration. Failure to do this on time may result in delays in registration or restrictions on access to certain campus facilities and privileges.

Your cooperation in this important exercise is appreciated as we work together to maintain a healthy and supportive university environment.

Attached is a downloadable Student Medication Examination form.
